Projects

GadgetHub Manager (CRUD Operation)

Stack: React, JavaScript, Tailwind CSS, Axios, Mock RESTful API (Deployed on Render)

Description:

- Developed a full CRUD system for data management, demonstrating proficiency with React Hooks for asynchronous data handling and dynamic form management.
- Implemented client-side data features including real-time search, multi-column sorting, and multi-page pagination to efficiently navigate and manage large datasets.

- Developed an integrated Analytics Dashboard for monitoring data activity and status, providing clear insights via data visualization charts.
- Integrated with and deployed a custom Mock RESTful API (JSON Server hosted on Render), showcasing end-to-end front-end to back-end interaction and deployment skills.

Cauntr Platform (Collaborative UI Implementation)

Stack: Next.js, React, TypeScript, Tailwind CSS, Figma Integration

Description:

- Collaborated with a full-stack developer, focusing entirely on UI component implementation based on a detailed Figma design system.
- Translated complex, multi-page designs into production-ready, mobile-first interfaces using Tailwind CSS and Next.js routing.
- Built high-fidelity, reusable components (navigation, data cards, complex forms) ensuring pixel-perfect adherence to the Figma design specs.
- Demonstrated professional Git workflow and teamwork by managing feature branches and contributing to a shared repository.
